CONTENTS OF VOLUME 76

NUMBER 1—MAY 1992

Adiabatic pair potential of highly charged plates in an electrolyte
By Ikuo S. Sogami, T. Shinohara and M. V. Smalley 1

Collision frequencies and pressure in simple classical fluids
By F. del Rio 21

Effective hard-sphere diameters and equations of state
By F. del Río 29

Electron localization and delocalization in biselectrophores
By J. Rautter, A. Grupp, M. Mehring, J. Alexander, K. Müllen and W. Huber ... 37

Measurement of spin-5/2 relaxation in biological and macromolecular systems using multiple-quantum NMR techniques
By Chun-Wa Chung and S. Wimperis 47

NMR study of solid lactic acid (2-hydroxypropanoic acid)
By M. L. Buszko and E. R. Andrew 83

Efficient Newton–Raphson and implicit Euler methods for solving the HNC equation
By A. Busigin and C. R. Phillips 89

A molecular dynamics simulation of sulphur hexafluoride
By A. Brodka and T. W. Zerda 103

The chemical potential of non-spherical solute in the infinitely diluted mixture
By B. Tříska and T. Boublík 113

The structure of fluid carbon dioxide by neutron diffraction at high pressure and by RISM calculations
By T. Bausenwein, H. Bertagnolli, D. Gutwerk, K. Tödheide and P. Chieux 127

Geometry and intermolecular structure of *N*-methylformamide in the liquid phase as measured by neutron scattering
By J. Neuefeind, P. Chieux and M. D. Zeidler 143

^{17}O NMR evidence for 180°-flips of $(COOH)_2$ units in dimethylmalonic acid
By B. Filsinger, H. Zimmermann and U. Haeberlen 157

Two-dimensional caesium–ammonia solid solutions in $C_{28}Cs(NH_3)_x$
By C. J. Carlile, I. McL. Jamie, G. Lockhart and J. W. White 173

A restricted active space SCF study of the lifetime of the $A^3\Pi$ state of SH^+
By Remedios González-Luque, Manuela Merchán and B. O. Roos 201

Numerical simulation of effectively nonergodic systems
By E. Enciso, N. G. Almarza and F. J. Bermejo 211

Quadrupole coupling measurements on $^{35}ClNO$
By M. A. Roehrig and S. G. Kukolich 221

Magnetic and electrical properties of benzene
By J. D. Augspurger and C. E. Dykstra 229

Errata 239

NUMBER 2—10 JUNE 1992

Preliminary Communication

Computer simulation studies of anisotropic systems. XX. On the validity of the Maier–Saupe approximations for the Gay–Berne nematogen
By A. P. J. Emerson, R. Hashim and G. R. Luckhurst 241

Invited Article

Free energy calculations in molecular biophysics
By C. A. Reynolds, P. M. King and W. G. Richards 251

Evidence from the special relativity and blackbody radiation theories for the existence of photons possessing zero kinetic energy
By R. J. Buenker 277

Theoretical spectroscopy of copper monoxide
By D. Hippe and S. D. Peyerimhoff 293

Spectroscopy of MnCl: vibrational analysis of a band system near 877 nm and observation of a new band system near 1001 nm
By O. Launila 319

Perturbation theory of polar nonspherical molecule fluids
By T. Boublík 327

Determination of the transient polarization response of a dipolar fluid
By P. G. Kusalik 337

The polarizabilities of species present in ionic solutions
By N. C. Pyper, C. G. Pike and P. P. Edwards 353

Analysis of the role of attractive forces in self-diffusion of a simple fluid
By J. E. Straub 373

Is the C_8 ring nonplanar?
By Z. Slanina, J. Kurtz and L. Adamowicz 387

High resolution neutron powder diffraction studies of the low temperature crystal structure of molecular iodine (I_2)
By R. M. Ibberson, O. Moze and C. Petrillo 395

Structure of solid cyanamide at 13 K
By B. H. Torrie, R. Von Dreele and A. C. Larson 405

Monte Carlo calculations of Xe arrangement and energetics in the NaA alpha cage
By P. R. Van Tassel, H. T. Davis and A. V. McCormick 411

Thermal conductivity of (+)- and (±)-camphor at pressures up to 0.5 GPa and temperatures down to 40 K
By O. Andersson and R. G. Ross 433

Correlated calculations of the rotational *g*-tensor and origin independent magnetizability surface of BH
By S. P. A. Sauer, J. Oddershede and J. Geertsen 445

The fundamental vibrational frequencies of the silyl anion (SiH_3^-)
By M. Shen and H. F. Schaefer III 467

***Ab initio* post-Hartree–Fock study on tautomeric stabilities of phosphine oxide, phosphinous acid and their thio analogues**
By J. S. Kwiatkowski and J. Leszczyński 475

Research Note

The strong biorthogonality condition
By S. Wilson 485

NUMBER 3—20 JUNE 1992

The proton exchange cross-relaxation model of water relaxation in biopolymer systems
By B. P. Hills 489

The proton exchange cross-relaxation model of water relaxation in biopolymer systems. II. The sol and gel states of gelatine
By B. P. Hills 509

An NMR investigation of proton transfer dynamics in solid naphthazarin B and C
By E. C. Reynhardt 525

Sulfur clusters: structure, infrared, and Raman spectra of cyclo-S_6 and comparison with the hypothetical cyclo-O_6 molecule
By Yaoming Xie, H. F. Schaefer III, Jee Hwang Jang, Byung Jin Mhin, Ho Soon Kim, Chang Woo Yoon and Kwang S. Kim 537

The luminescent triplet state of VO_4^{3-} in YPO_4. I. Polarization of the emission
By J. Van Tol, J. A. Van Hulst and J.H. Van Der Waals 547

The luminescent triplet state of VO_4^{3-} in YPO_4. II. Electron paramagnetic resonance and ^{51}V electron nuclear double resonance
By J. Van Tol and J. H. Van Der Waals 567

Polarization effects in resonant four-wave-mixing processes
By Ilse Aben, Wim Ubachs, Gert Van Der Zwan and Wim Hogervorst 591

Quantitative determination of the total local polarity (charge separation) in molecules
By T. Brinck, J. S. Murray and P. Politzer 609

Potential energy functions for atomic solids. IV. Reproducing the properties of more than one solid phase
By B. R. Eggen, R. L. Johnston, S. Li and J. N. Murrell 619

Brownian dynamics simulation of dipole suspensions under shear: the phase diagram
By J. R. Melrose 635

Response theory of symmetry restricted interactions
By D. J. Evans, A. Baranyai and S. Sarman 661

Computer simulation of the vibrational spectrum of a simple system with ultrafast chemical reaction
By S. Weiss 669

X-ray and neutron diffraction studies of the hydration of SeO_4^{2-} and CrO_4^{2-} anions by isomorphic substitution
By R. Caminiti, F. Cilloco and R. Felici 681

The structure of a confined fluid of cylindrical 'molecules': simulation and theory
By M. Calleja and G. Rickayzen 693

Density-functional theory of the water liquid–vapour interface
By B. Yang, D. E. Sullivan, B. Tjipto-Margo and C. G. Gray 709

Solvophobic interaction in a simple associated fluid. A study on the basis of Wertheim's theory on associated fluids
By Y. Kimura and Y. Yoshimura 737

Generalized virial expansions II. Efficient numerical algorithms for classical ionic systems
By H. Krienke and R. Thamm 757

NUMBER 4—JULY 1992

Papers on Surface Science and Spectroscopy

Editorial 775

Keynote Article: Reactions at metal surfaces involving valence electron excitations
By G. Ertl and E. Hasselbrink 777

X-ray photoelectron diffraction of Ni(110)-2 × 1-CO p2mg layer. Intermolecular scattering
By O. Knauff, U. Grosche, H. P. Bonzel and V. Fritzsche 787

CF_2HCl monolayers physisorbed on graphite
By A. R. B. Shirazi and Klaus Knorr 807

The first stages of lipid layer formation. A metastable impact electron spectroscopy study of egg lecithin dissolved in hydroxypropionitrile
By H. Morgner, J. Oberbrodhage and K. Richter 813

Co-adsorption of CO and O_2 on Fe. II. Calorimetric determination of heats of adsorption on polycrystalline Fe films and thermal desorption spectroscopy
By I. Ganzmann, D. Borgmann and G. Wedler 823

A combined infrared, temperature programmed desorption and temperature programmed reaction spectroscopy study of CO_2 and H_2 interactions on reduced and oxidized silica-supported copper catalysts
By G. J. Millar, C. H. Rochester, C. Howe and K. C. Waugh 833

Surface chemistry of carbon: activation of molecular oxygen
By F. Atamny, J. Blöcker, A. Dübotzky, H. Kurt, O. Timpe, G. Loose, W. Mahdi and R. Schlögl 851

Chemisorption of fluorine, hydrogen and hydrocarbon species on the diamond C(111) surface
By T. Yamada, T. J. Chuang, H. Seki and Y. Mitsuda 887

Interface formation of alkali metals on Si(111) surfaces
By K. O. Magnusson, S. Wiklund, R. Dudde and B. Reihl 909

High resolution monochromated X-ray photoelectron spectroscopy of organic polymers: A comparison between solid state data for organic polymers and gas phase data for small molecules
By G. Beamson and D. Briggs 919

Studies of surface and interface segregation in polymer blends by secondary ion mass spectrometry
By S. A. Schwarz, B. J. Wilkens, M. A. A. Pudensi, M. H. Rafailovich, J. Sokolov, X. Zhao, W. Zhao, X. Zheng, T. P. Russell and R. A. L. Jones 937

Orientational ordering in liquid crystals. Isotope labelling neutron diffraction experiments
By R. W. Date, I. W. Hamley, G. R. Luckhurst, J. M. Seddon and R. M. Richardson 951

Dynamic q space microscopy of cellular tissue
By B. P. Hills and J. E. M. Snaar 979

The remarkable enneahydridorhenate dianion: ReH_9^{2-}
By M. Shen, H. F. Schaefer III and H. Partridge 995

The effect of molecular mobility on spin exchange in dinitroxylpinacol
By E. G. Rozantsev, O. A. Ozhogina, R. R. Rakhimov and A. I. Prokof'ev 1009

Research Notes

A mean field theory of dipole–dipole correlation in nematic liquid crystals
By D. A. Dunmur and P. Palffy-Muhoray 1015

Heat of formation of the hydroperoxyl radical (HO_2) determined using density functional theory
By E. Sicilia and N. Russo 1025

NUMBER 5—10 AUGUST 1992

Preliminary Communication

Infrared diode-laser spectroscopy of the electronic ground state of GeD ($X^2\Pi_{1/2}$)
By G. Huhn, U. Simon, M. Petri, W. Zimmermann and W. Urban 1029

Effect of an electric field on a methane molecule I. Infrared analysis of methane adsorbed in CaA zeolite
By J. Soussen-Jacob, A. M. Goulay and E. Cohen de Lara 1037

Effect of an electric field on a methane molecule II. Infrared intensity of the components of the splitting of the v_3 vibrational mode
By E. Cohen de Lara, A. M. Goulay, J. Soussen-Jacob and R. Kahn 1049

The structure of fluid dichlorodifluoromethane. A comparison between molecular dynamics simulation and neutron diffraction results
By C. D. Hall, K. A. Johnson, A. N. Burgess, N. Winterton and W.S. Howells 1061

The hexagonal phase of sulfur hexafluoride by molecular dynamics simulation of free clusters
By F. M. Bénière, A. H. Fuchs, M.-F. de Feraudy and G. Torchet 1071

Melting of sulfur hexafluoride clusters by molecular dynamics simulation
By B. Rousseau, A. Boutin, A. H. Fuchs and C. J. Craven 1079

Studies of the Gaussian model II. The two-component system
By A. Baram, M. W. Maddox and J. S. Rowlinson 1093

Magnetic moments of the dimeric multielectronic mixed valance clusters in the dynamic model of intermediate vibronic coupling
By B. S. Tsukerblat, A. B. Palii, H. M. Kishinevsky, V. Ya. Gamurar and A. S. Berengol'ts 1103

Double-quantum coherence detection in a spin-3/2 system excited by two consecutive pulses
By Pascal P. Man 1119

Isotope and temperature effects of the vibrational and rotational relaxation in molten alkali hydroxides
By Yasunobu Suzuki, Susumu Okazaki and Isao Okada 1131

On the use of variational wavefunctions in calculating vibrational band intensities
By C. Ruth Le Sueur, Steven Miller, Jonathan Tennyson and Brian T. Sutcliffe 1147

Ground-state constants, A_0, D_0^K and H_0^K of $^{12}C_3I$ from normally allowed infrared absorption bands
By R. Paso, S. Alanko and R. Anttila 1157

Multiple quantum NMR spectroscopy on $I > 1$ nuclei in anisotropic systems
By István Furó and Bertil Halle 1169

An asymptotic spatial generalization of Kato's theorem for really heavy atoms in nonrelativistic theory
By N. H. March and P. Wind 1199

The phase instability of molecular fluid mixtures: dipolar and neutral hard spheres
By X. S. Chen and F. Forstmann 1203

***Ab initio* calculation of the thermal conductivity of neon in the liquid and hypercritical state over a wide pressure range**
By Rolf Eggenberger, Stefan Gerber, Hanspeter Huber, Debra Searles and Marc Welker 1213

Structure of water–methanol binary mixtures: role of the water–water interaction
By Hideki Tanaka, John Walsh and Keith E. Gubbins 1221

An eigenvalue moment method analysis of the $V(x) = |\omega^2/2|x^2 + \alpha x^3 + \beta x^4$ anharmonic oscillator
By Carlos R. Handy 1235

Quantum decay rates in dense media
By S. G. Christov 1241

Research Notes

On the nature of the reaction path from the $^2B_2$ stationary point to the $\tilde{X}^2A_1$ minimum on the lowest $^2A'$ potential energy surface of NO_2
By Gerhard Hirsch, Robert J. Buenker and Carlos Petrongolo 1261

Detailed balance factors for freely rotating linear molecules
By W. A. Steele 1265

More accurate equations of state for non-spherical hard-particle fluids
By M. J. Maeso, J. R. Solana and J. Amoros 1269

NUMBER 6—20 AUGUST 1992

Preliminary Communication

Hard ellipsoids of revolution with square wells: a comparison between computer simulation and theory in the liquid–vapour region
By E. De Miguel and M. P. Allen 1275

On the interaction potential of graphite intercalated alkali metals
By P. A. Wielopolski and J. W. White 1281

Electron-correlated calculations of magnetic properties. I. Magnetizability of H_2 and HF
By S. M. Cybulski and D. M. Bishop 1289

Dipole moment and polarizability of hydrogen selenide
By G. Maroulis 1303

Molecular packing of fullerene C_{60} at room temperature
By D. André, A. Dworkin, H. Szwarc, R. Céolin, V. Agafonov, C. Fabre, A. Rassat, L. Straver, P. Bernier and A. Zahab 1311

Vapour liquid equilibria of the Lennard-Jones fluid from the *NpT* plus test particle method
By A. Lotfi, J. Vrabec and J. Fischer 1319

A quantum Monte Carlo study of liquid Lennard-Jones methane, path-integral and effective potentials
By L. M. Sesé 1335

Exact Langevin algorithms
By B. Mehlig, D. W. Heermann and B. M. Forrest 1347

Liquid crystal smectic-A phases and issues of geometry
By G. T. Evans 1359

Fracture of model gel networks
By M. J. Grimson 1375

Molecular dynamics with anisotropic site potentials: butane
By P. M. Rodger 1385

Distribution functions in liquid mixtures: molecular dynamics simulations and mean field theory
By S. Toxvaerd 1397

Monte Carlo simulation of the equation of state of hard tetrahedral molecules
By J. L. F. Abascal and F. Bresme 1411

Integral equation study of hard sphere fluids near a hard cylinder macromolecule
By R. Pospíšil and A. Malijevský 1423

Infrared and ultraviolet spectroscopic characterization of trifluoroacetaldehyde
By J. S. Francisco and I. H. Williams 1433

High resolution spectrum of $^{14}N^{16}O$ in the far infrared region: $^2\Pi_{3/2}$–$^2\Pi_{1/2}$ transitions
By A. H. Saleck, G. Winnewisser and K. M. T. Yamada 1443

Interaction-induced Raman and IR spectra of liquid CS_2. Temperature and perturber effects
By E. Dayan, E. Dervil, J. Loisel, J. P. Pinan-Lucarre and G. Tarjus 1457

Investigation of excited vibrational levels in the $X^2\Sigma^+$ state of CaOH and CaOD by resolved fluorescence spectroscopy
By J. A. Coxon, M. Li and P. I. Presunka 1463

Anharmonic resonances between the $v_1 + v_6^{\pm 1}$, $v_3 + v_5^{\pm 1} + 2v_6^0$ and $v_3 + v_5^{\mp 1} + 2v_6^{\pm 2}$ vibrational bands of $CH_3{}^{79}Br$
By M. Ouahman, N. Ben Sari-Zizi, G. Guelachvili and C. Alamichel 1477

On the stability of the singly and doubly charged beryllium trimers Be_3^+ and Be_3^{++}
By H. Hogreve 1489

Research Note

The ion distribution in *n*-butylammonium vermiculite gels
By M. V. Smalley 1501
